DS Printech China – your prime opportunity to capitalise on strong textile printing market

The global **digital textile printing market** is anticipated to see a CAGR of 12.1% from 2022 to 2030, with Asia-Pacific projected as the fastest-growing region. In the **screen printing market**, China is expected to well exceed the global average with a 21.6% CAGR until 2027.

The country's world-leading textile industry is a huge driver of growth for both sectors. Accuracy, speed, and small volume capabilities are some of the desirable attributes powering demand for digital textile printing, while automated screen printing has achieved new heights courtesy of the pandemic.

Set for an East China return in 2023, **DS Printech China** is among Asia's most influential digital and screen printing platforms, and a business-friendly gateway to one of the world's biggest and fastest-growing markets.

9 featured categories to attract targeted buyers

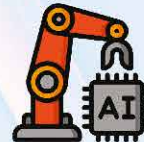

Digital printing

Screen printing

Textile printing

Intelligent manufacturing

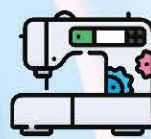

Industrial Printing

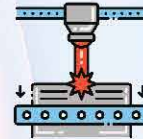

Personalised printing

Overseas zone

Apparel embroidery

Laser printing

Testimonials from industry leaders

"DS Printech China has acted as a catalyst for the industry's recovery. Our main goal here is to establish new sales channels, especially in the major apparel manufacturing provinces. The fair has helped us grasp the exciting opportunities presented in the region. It is more efficient for us to promote our machines in person than online, as customers can learn about the operation of the equipment and the printing effects."

Mr Denis Sun, Sales Manager, Stahls' Trading (Shenzhen) Co Ltd, USA

"Entering into the digital era, we need to be more responsive to market demands – such as small quantity orders, quick turnaround, and customisation. The visitors we've met here at DS Printech China are highly professional as they know a lot about the Chinese market and have very specific requirements."

Mr. Lei Xu, Sales Manager, Brother Machinery, Japan
